

Table of Contents

About the cover	3
Table of Contents	4
Rounding off numbers and results.....	10
Pictures, Figures, Equations and Tables	10
Symbols used in this book	10
A. Introduction	11
B. Why this book.....	12
C. About this book	13
D. What this book is not	13
E. For who is this book.....	14
F. Nomenclature	15
G. The coordinate system	37
 1 Principle working of the Hydraulic Platform Transporter	56
1.1 What is a platform.....	57
1.2 Difference between a 3-point and 4-point suspension	58
1.2.1 What exactly happens when “rocking” occurs	58
1.2.1.1 Resonance	59
1.2.1.2 Overload.....	59
1.2.2 Why do 4-point suspension systems exist	59
1.3 Other suspension systems.....	60
1.4 What is the stability area	60
1.5 The Center of Gravity (CoG).....	62
1.6 The hydraulic platform transporter, naming convention and colour coding	64
1.6.1 Naming convention for valves	64
1.6.2 Color coding hydraulic lines.....	66
1.6.3 Naming convention for transporter direction and suspension groups.....	66
1.6.3.1 Transporter direction	67
1.6.3.2 Suspension groups	70
1.7 Transporter suspension system, example 1-a	74
1.7.1 Transporter stability area, example 1-b (graphical)	75
1.7.2 Transporter stability area, example 1-c (mathematical)	76
1.8 Transporter suspension system, example 2-a	81
1.8.1 Transporter stability area, example 2-b (graphical)	82
1.8.2 Transporter stability area, example 2-c (mathematical)	83
1.9 Transporter suspension system, example 3-a	86
1.9.1 Transporter stability area, example 3-b (graphical)	87
1.9.2 Transporter stability area, example 3-c (mathematical)	88
1.10 Transporter suspension system, example 4-a	92
1.10.1 Transporter stability area, example 4-b (graphical)	93
1.10.2 Transporter stability area, example 4-c (mathematical)	94
1.11 Transporter suspension system, example 5-a	98
1.11.1 Transporter stability area, example 5-b (graphical)	100
1.11.2 Transporter stability area, example 5-c (mathematical)	101

1.12	Transporter suspension system, example 6-a	104
1.12.1	Transporter stability area, example 6-b (graphical)	106
1.12.2	Transporter stability area, example 6-c (mathematical)	107
1.13	Transporter suspension system, example 7-a	111
1.13.1	Transporter stability area, example 7-b (mathematical)	112
1.14	The aftermath.....	115
2	Stability Area and Transporter CoG, where are they located	117
2.1	Stability Area of the pendulum axle.....	117
2.2	Stability Area of the fusee axle	119
2.3	Stability Area, when on a cambered road.....	120
2.4	What if the stability area is assumed at the transporter deck (pendulum axle)	122
2.5	What if the stability area is assumed at the transporter grade (pendulum axle)	123
2.6	Transporter CoG	124
2.7	The aftermath.....	126
3	Center of Gravity kinetics	128
3.1	Center of Gravity kinetics, example 1-a.....	128
3.2	Center of Gravity kinetics, example 1-b (graphical).....	129
3.3	Center of Gravity kinetics, example 1-c (mathematical)	130
3.3.1	Express both lines as an equation (ALPHA-BRAVO) and (CoG-P1).....	131
3.3.2	Set the equations equal to each other (ALPHA-BRAVO) and (CoG-P1).....	133
3.3.3	Solve the x and y-coordinate (ALPHA-BRAVO) and (CoG-P1).....	133
3.3.4	Use Pythagoras theorem to calculate the distance (D) from CoG to P1	134
3.3.5	Express both lines as an equation (CHARLY-DELTA) and (CoG-P2).....	134
3.3.6	Set the equations equal to each other (CHARLY-DELTA) and (CoG-P2)	135
3.3.7	Solve the x and y-coordinate (CHARLY-DELTA) and (CoG-P2).....	135
3.3.8	Use Pythagoras theorem to calculate the distance (D) from CoG to P2	135
3.3.9	Express both lines as an equation (DELTA-ALPHA) and (CoG-P3).....	136
3.3.10	Set the equations equal to each other (DELTA-ALPHA) and (CoG-P3).....	136
3.3.11	Solve the x and y-coordinate (DELTA-ALPHA) and (CoG-P3).....	137
3.3.12	Use Pythagoras theorem to calculate the distance (D) from CoG to P3.....	137
3.3.13	Express both lines as an equation (BRAVO-CHARLY) and (CoG-P4)	137
3.3.14	Set the equations equal to each other (BRAVO-CHARLY) and (CoG-P4)	138
3.3.15	Solve the x and y-coordinate (BRAVO-CHARLY) and (CoG-P4)	138
3.3.16	Use Pythagoras theorem to calculate the distance (D) from CoG to P4.....	139
3.3.17	The aftermath	139
3.4	Center of Gravity kinetics, example 2 (mathematical)	141
3.4.1	Express both lines as an equation (CHARLY-DELTA) and (CoG-P1).....	142
3.4.2	Set the equations equal to each other (CHARLY-DELTA) and (CoG-P1)	144
3.4.3	Solve the x and y-coordinate (CHARLY-DELTA) and (CoG-P1).....	144
3.4.4	Use Pythagoras theorem to calculate the distance (D) from CoG to P1	144
3.4.5	Express both lines as an equation (BRAVO/BRAVO-CHARLY) and (CoG-P2)	145
3.4.6	Set the equations equal to each other (ALPHA/BRAVO-CHARLY) and (CoG-P2)...	146
3.4.7	Solve the x and y-coordinate (ALPHA/BRAVO-CHARLY) and (CoG-P2).....	146
3.4.8	Use Pythagoras theorem to calculate the distance (D) from CoG to P2	147
3.4.9	Express both lines as an equation (DELTA-ALPHA/BRAVO) and (CoG-P3)	147
3.4.10	Set the equations equal to each other (DELTA-ALPHA/BRAVO) and (CoG-P3) ..	149

3.4.11	Solve the x and y-coordinate (DELTA-ALPHA/BRAVO) and (CoG-P3)	149
3.4.12	Use Pythagoras theorem to calculate the distance (D) from CoG to P3.....	150
3.4.13	The aftermath	150
3.5	Center of Gravity kinetics, example 3 (mathematical)	152
3.5.1	Express both lines as an equation (CHARLY-DELTA) and (CoG-P1).....	153
3.5.2	Set the equations equal to each other (CHARLY-DELTA) and (CoG-P1)	155
3.5.3	Solve the x and y-coordinate (CHARLY-DELTA) and (CoG-P1).....	155
3.5.4	Use Pythagoras theorem to calculate the distance (D) from CoG to P1	156
3.5.5	Express both lines as an equation (ALPHA/BRAVO-CHARLY) and (CoG-P2).....	156
3.5.6	Set the equations equal to each other (ALPHA/BRAVO-CHARLY) and (CoG-P2)....	158
3.5.7	Solve the x and y-coordinate (ALPHA/BRAVO-CHARLY) and (CoG-P2).....	158
3.5.8	Use Pythagoras theorem to calculate the distance (D) from CoG to P2	158
3.5.9	Express both lines as an equation (DELTA-ALPHA/BRAVO) and (CoG-P3)	159
3.5.10	Set the equations equal to each other (DELTA-ALPHA/BRAVO) and (CoG-P3)..	160
3.5.11	Solve the x and y-coordinate (DELTA-ALPHA/BRAVO) and (CoG-P3)	161
3.5.12	Use Pythagoras theorem to calculate the distance (D) from CoG to P3.....	161
3.5.13	The aftermath	162
3.6	Difference between a 3-point, a 4-point and a 1.5-wide system.....	162
4	Hydraulic stability.....	165
4.1	Hydraulic stability, 4-point suspension, example 1	165
4.1.1	Calculation of hydraulic stability angles, example 1	168
4.2	Hydraulic stability, 4-point suspension, example 2, influence of combined CoG	171
4.2.1	Calculation of hydraulic stability angles, example 2	171
4.3	Hydraulic stability, 4-point suspension, example 3, influence of the suspension	173
4.3.1	Calculation of hydraulic stability angles, example 3	173
4.4	Hydraulic stability, 3-point suspension, example 4	175
4.4.1	Calculation of hydraulic stability angles, example 4	177
4.5	Hydraulic stability, 1.5-wide configuration, example 5.....	179
4.5.1	Calculation of hydraulic stability angles, example 5	181
4.6	Difference between a 3-point, a 4-point and a 1.5-wide system.....	183
4.7	The aftermath.....	185
5	Two different types of stability	187
5.1	Hydraulic stability statement	187
5.2	Structural stability statement	187
5.3	Two different types of stability arms	188
5.3.1	The relation between hydraulic $D_{R\text{cog}-P_x}$ and structural $D_{R\text{cog}-S_x}$ stability arms.....	188
5.4	The aftermath.....	189
6	Structural stability	191
6.1	Structural stability, 4-point suspension, example 1	191
6.1.1	Calculation of structural stability angles, example 1	195
6.1.1.1	Calculation of longitudinal structural stability angle towards S1	197
6.1.1.2	What are the loads in each suspensions group in this scenario.....	199
6.1.1.3	Calculation of longitudinal structural stability angle towards S2	200
6.1.1.4	What are the loads in each suspensions group in this scenario.....	202
6.1.1.5	Calculation of transverse structural stability angle towards S3	203
6.1.1.6	What are the loads in each suspensions group in this scenario	205

6.1.1.7	Calculation of transverse structural stability angle towards S4	206
6.1.1.8	What are the loads in each suspensions group in this scenario	208
6.2	Structural stability, 4-point suspension, example 2, influence of the CoG	211
6.2.1	Calculation of structural stability angles, example 2	211
6.3	Structural stability, 4-point suspension, example 3, influence of the suspension	213
6.3.1	Calculation of structural stability angles, example 3	213
6.4	Structural stability, 3-point suspension, example 4	216
6.4.1	Calculation of structural stability angles, example 4	220
6.4.1.1	Calculation of longitudinal structural stability angle towards S1	222
6.4.1.2	What are the loads in each suspensions group in this scenario	224
6.4.1.3	Calculation of longitudinal structural stability angle towards S2	226
6.4.1.4	What are the loads in each suspensions group in this scenario	229
6.4.1.5	Calculation of longitudinal structural stability angle towards S3	230
6.4.1.6	What are the loads in each suspensions group in this scenario	233
6.5	Structural stability, 1.5-wide configuration, example 5	236
6.5.1	Calculation of structural stability angles, example 5	241
6.5.1.1	Calculation of longitudinal structural stability angle towards S1	241
6.5.1.2	What are the loads in each suspensions group in this scenario	245
6.5.1.3	Calculation of longitudinal structural stability angle towards S2	246
6.5.1.4	What are the loads in each suspensions group in this scenario	249
6.5.1.5	Calculation of longitudinal structural stability angle towards S3	251
6.5.1.6	What are the loads in each suspensions group in this scenario	254
6.6	Difference between a 3-point, a 4-point and a 1.5-wide system.....	256
6.7	The aftermath.....	256
7	Safe stability angles, limitations on Center of Gravity kinetics	259
7.1	How to interpret S_{HSA}	259
7.2	How to interpret S_{SSA}	259
7.3	Where do these angles originate from and why are they not equal in value	260
7.4	What if the safe angles are less than the safe stability limit	261
7.5	The aftermath.....	261
8	Limiting stability angle	263
8.1	Longitudinal limiting stability angle for 4-point suspension.....	264
8.2	Transverse limiting stability angle for 4-point suspension	267
8.3	Longitudinal limiting stability angle for 3-point suspension.....	270
8.4	Transverse limiting stability angle for 3-point suspension	273
8.5	The aftermath.....	278
9	Engineering case studies	281
9.1	Case study 1	281
9.1.1	Determine the CoS coordinates.....	282
9.1.2	Determine the P1, P2 and P3 coordinates.....	283
9.1.3	Determine $D_{RcoG-P1}$, $D_{RcoG-P2}$ and $D_{RcoG-P3}$	285
9.1.4	Determine combined CoG	286
9.1.5	Determine hydraulic (H) stability	287
9.1.6	Determine the initial loads per suspension group	287
9.1.7	Determine the S1, S2 and S3 coordinates.....	289
9.1.8	Determine $D_{RcoG-S1}$, $D_{RcoG-S2}$ and $D_{RcoG-S3}$	290

9.1.9	Determine structural (S) stability	290
9.1.10	In aftermath.....	291
9.2	Case study 2	293
9.2.1	Determine the CoS coordinates.....	294
9.2.2	Determine the P1, P2, P3 and P4 coordinates.....	295
9.2.3	Determine $D_{R\text{cog-P1}}$, $D_{R\text{cog-P2}}$, $D_{R\text{cog-P3}}$, and $D_{R\text{cog-P4}}$	297
9.2.4	Determine combined CoG	298
9.2.5	Determine hydraulic (H) stability	299
9.2.6	Determine the initial loads per suspension group	299
9.2.7	Determine the S1, S2, S3 and S4 coordinates.....	301
9.2.8	Determine $D_{R\text{cog-S1}}$, $D_{R\text{cog-S2}}$, $D_{R\text{cog-S3}}$ and $D_{R\text{cog-S4}}$	303
9.2.9	Determine structural (S) stability	303
9.2.10	In aftermath.....	303
10	About choosing the suspension groups.....	306
10.1	The guidelines.....	315
10.2	The aftermath.....	316
11	External forces	318
11.1	Acceleration forces.....	319
11.1.1	Acceleration forces, example 1	321
11.1.2	Acceleration forces, example 2	326
11.2	Curve or centrifugal forces	332
11.2.1	Curve forces, example 1	334
11.2.2	Curve forces, example 2	337
11.2.3	Curve forces in general.....	340
11.3	Wind forces.....	342
11.3.1	Wind forces, example 1	346
11.3.2	Wind forces, example 2	350
11.4	Influence of external forces on the hydraulic stability.....	355
11.5	Influence of external forces on the structural stability	355
11.5.1	Influence on a 4-point suspension configuration	356
11.5.1.1	Longitudinal structural stability towards S1	357
11.5.1.2	Longitudinal structural stability towards S3	358
11.5.2	Influence on a 3-point suspension configuration	360
11.5.2.1	Longitudinal structural stability towards S1	361
11.5.2.2	Longitudinal structural stability towards S3	363
11.6	The aftermath.....	366
12	Gradient forces	368
12.1	Gradient forces, example 1	370
12.2	Gradient forces, example 2	375
12.3	The aftermath.....	379
13	Lashing and securing	381
13.1	Reduction of the CoG height by using the combined CoG	381
13.1.1	Reduction of the CoG height by using the combined CoG, example 1	383
13.2	Securing against external forces	384
13.2.1	Securing against external forces, example 1	385
13.3	Securing against gradient forces	388

13.3.1	Securing against gradient forces, example 1.....	389
13.4	In summary;	389
13.5	Friction	390
13.5.1	The friction force.....	391
13.5.2	The friction factor μ (mu)	391
13.5.3	How to use friction to reduce lashing.....	392
13.5.4	Friction force, example 1	394
13.6	Applying lashing	396
13.6.1	Applying lashing, example 1	398
13.7	The aftermath.....	401
14	After thoughts.....	402
	Table of Figures.....	403
	Table of Pictures.....	408
	Table of Equations.....	410
	Abbreviations	411
